

Vetro Certification Materials

Hey there soon to be Vetro Certified Tech!

Below are the material requirements for this upcoming Vetro Certification/

REQUIRED means that these items are needed to obtain your certification.

RECOMMENDED means that we may do demos with these products, but you won't have to submit an assignment with them. It also means the item is a hot-seller.

If Vetro becomes one of your main lines, purchasing the curing unit is strongly recommended for the best experience using Vetro gels.

There is a \$25 certificate fee for this program. Your certificate is issued directly by Vetro Headquarters in Japan and mailed out to you by your corresponding distributor (Vetro US or Canada). To be issued a printed and mailed certificate you must complete a portfolio assignment and pay the \$25 with your distributor by the deadline. You must also fill out the form forwarded to you after submitting your portfolio, if this form is not submitted promptly, you will have to email your Vetro distributor for processing.

The required items below (in the "Required" column) are the minimum amount of Vetro items required to obtain your certification. When you opt out of the required products, you cheat yourself out of experiencing the Vetro Brand as a system.

You will be completing a portfolio assignment that will require you to take a picture of your Vetro items; this portfolio assignment is due approximately one week after the start of the certification week. More details will be emailed to you!
